

Sprint meeting 11

Meeting date: 13th march 2026

Supervisor: Haoyi Wang

Meeting time : 20 minutes

Progress:

- New font added to better fit style of game
- New menu screen added
- Generic button Ui updated to look more suitable
- Lots of rare crash potential bugs fixed
- Trains now work as intended
- Buses added with accompanying NPC code
- Dynamic npc bus sprite added to face the correct way when moving
- Bus tiles added and road tiles updated to be in line with new tiles
- Added road tile class to allow for connecting routes

Suggestions/observations/discussions/questions from/with supervisor

- Buses are a bit big
- The building info is a bit hard to spot in its current position, making it appear above the building upon a mouse hover may be better
- NPC navigation glitch spotted
- Possibility of adding water generation on the map was discussed as well as expanding map creating options
- I mentioned the things I wanted to get done this sprint I was unable to, particularly settings and some graphical enhancements
- Road network with paths should have npcs avoiding walking on the road
-

Going forward

- Fix rating glitch
- Sound effects should be added
- Building information should appear on hover
- Overall gameplay will be made more succinct and focused

- Npc navigation will be updated
- Settings will be added
- UI and sprites to be continued to be updated
- Fix road tiles connecting issues
- Add final road tiles
- Buses will be made smaller
- If possible water tiles would be added as a sort of stretch goal
