

Sprint meeting 10

Meeting date: 3rd march 2026

Supervisor: Haoyi Wang

Meeting time : 20 minutes

Notes :

- Meeting delayed a few days
- Reduced progress due to other deadline on the 3rd march

Progress:

- Added train station building
- Added Ui for different transport options
- Added UI for railway transport option
- Added dynamic tiles for rail + all required sprites
- Added route creation UI
- Created trains that run along routes
- Added algorithm to find best path for trains along rails
- Upgraded NPC Path finding to not walk on track or buildings
- Fixed lots of bugs (including many crashable bugs)
- Added building info to be displayed onUI on click of building
- Added penalties for low power
- Expanded power plant functionality requiring them to be within range of buildings
- Added rating system for power reach
- Added symbols that appear on buildings when they have no power
- Made npcs leave when unhappy
- Implemented a trade functionality for energy allowing the user to buy/sell it depending on needs
- Added warning messages when power reserves are running low
- Added cap for power reserves
- Updated info display so NPC count is displayed
- Added pop up if the user does not have enough money to build a building and prevents their placement
- Added some more differentiation between game modes
- Added a money system

Suggestions/questions from supervisor

- How do Npcs determine their happiness/how do you keep npcs happy?
- Will Npcs take into account the wait for trains when making routing decisions?
- Do NPCs have jobs
- Buses would be good as a a medium size transportation method
- Reminder about the money system

Going forward

- Graphics overhaul to begin
- Train functionality to be completed
- Poster will be worked on
- If time jobs would be added
- Bus functionality to be added as a mid point between trains and walking
