

Sprint meeting 8

Meeting date: 30th January 2026

Supervisor: Haoyi Wang

Meeting time : 10 minutes

Progress:

- Added some functionality to buildings
- This was partially done by adding to NPCs, where NPCs felt necessary to properly add the functionality of the buildings
- The result is NPCs with weighted decisions which use these buildings
- City rating also added to add gameplay elements
- Due to less time then expected over christmas break, the graphical overhaul and the implementation of a bgm were pushed back

Suggestions/questions from supervisor

- Supervisor asked how NPCs worked and how the additions of buildings went
- Supervisor asked how the rating system worked and was interested to see how this develops
- The supervisor asked if auto save will be added. I believe this will be easy to do as the functionality for saving will already exist

Going forward

- BGM will be implemented
- Graphical overhaul will be completed at some point
- Rating system will be expanded
- NPCs and buildings will be improved
- UI graphical issues will be fixed
